

# P-22

## Acid Cleaner

### DESCRIPTION:

P-22 is a specially designed, acid based product for cleaning and brightening stainless steel, aluminum, ceramic tile and arborite type surfaces. P-22 also removes scale, stain and other mineral deposits from chemical lines.

### FEATURES:

Use only on acid resistant surfaces.

### DIRECTIONS:

Dilute P-22 from 1- 5 to 1-30 parts with water. Apply to surface to be cleaned and then rinse.

**For further information, please review the Safety Data Sheet (SDS) and Product Label.**

### STORAGE & HANDLING:

Keep from freezing. Store upright in original closed container at room temperature away from children. Do not mix with any other chemicals.

This material is corrosive .
